MUGISHA AIME DIDIER

SUMMARY

As a talented software developer and tech innovator, my goal is to leverage my expertise in backend web development, mobile application development, embedded electronics projects, and Internet of Things to drive innovation and deliver value to organizations. I am seeking a challenging role that will allow me to continue to learn and grow, and contribute to the success of a dynamic company.

SKILLS & ABILITIES

- Backend web development using Laravel.
- Mobile application development using Flutter
- Internet of Things (IoT)
- Strong problem-solving and analytical skills
- Excellent communication and interpersonal skills
- Self-motivated and driven to learn and innovate

EXPERIENCE

SOFTWARE DEVELOPER, QUARKS GROUP LTD

23/01/2023 - Present

While am working on QUARKS GROUP Ltd my responsibility includes:

- Working with a team to analyze the issues brought by client and support team

- Writing codes in Laravel in backend for web apps and mobile applications.

- Writing codes in dart for flutter framework in frontend for iOS and Android mobile application

INTERN, NYEREKA TECH LTD

09/01/2023 - Present

I'm working in Embedded IoT for the implementation of new features and maintenance of our embedded software running on physical things – from smart homes, wearables, medical devices, automobile, industrial automation and more.

CEO & SOFTWARE DEVELOPER, ITARATEC LTD

16/09/2021 - Present

I am building a company called ITARATEC that specialized in consumer electronics, software and online services, it will present my software products and embedded IoT systems.

FOUNDER & SOFTWARE DEVELOPER, PREMETER LTD

05/01/2020 – 16/09/2021

I had built a tech startup company called PREMETER that specialized in consumer electronics and online services, it was providing prepaid water meters. I attended 250 Startups incubation program for 10 months and while am working on PREMETER my responsibility includes: Full stack web development, Hardware product development, Pitching about that solution, Pitch deck designing.

EDUCATION

2019-2022 IPRC HUYE – ADVANCED DIPLOMA IN ELECTRONICS AND TELECOMMUNICATION

As a student I got a good basic electronics background with specialization in analog and digital telecommunications, copper and fiber optic media, radio communications, and digital electronics.

2016-2018 ECOLE SAINT KIZITO SAVE – A2 IN COMPUTER AND ELECTRONICS

In computer and electronics, I learned programming, computer hardware, electronics, digital signal processing, microcontrollers and embedded systems, networking, operating systems, and artificial intelligence.

COMMUNICATION

As a software developer and tech innovator, I understand the importance of clear and effective communication. I have honed my communication skills through my experience building and managing startup companies, participating in innovation challenges, and working with diverse teams in my current roles as a software developer. I am confident in my ability to communicate complex technical concepts to both technical and non-technical stakeholders.

LEADERSHIP

I am a natural leader and team player, able to inspire and motivate team members to achieve their full potential. Through my experience of working with diverse teams, I have developed strong leadership and interpersonal skills.
